The Animal Development chapter of this Campbell Biology Companion Course helps students learn the essential lessons associated with animal development. Each of these simple and fun video lessons is...

### Campbell Biology Chapter 47: Animal Development - Study.com

There are some general structures that can be attributed to the germ layers during development. The ectoderm gives rise to the outer coverings of the body, such as the skin, and to the central nervous system. The ectoderm produces the notochord and primitive neural structures very early in development. The mesoderm gives rise to the muscles and bones.
