Her five kingdoms can be interpreted as six kingdoms (commonly the Archaea are separated from the other bacteria to form the sixth kingdom), or as over 30 kingdoms (if Carl Woese's system is used.) For practical purposes the six kingdom's concept seems reasonable to me, although specialists may prefer a more complex grouping and several "domains" of life.

Five Kingdoms | work by Margulis and Schwartz | Britannica

Five Kingdoms of Nature The concept of the 5 Kingdoms of Nature is inspired by the work of Prof. Dr. Lynn Margulis in her milestone reference work "The 5 Kingdoms of Nature." The name kingdom is scientifically very much accepted, though some prefer to talk about domains as to make this more gender neutral.

Five Kingdoms of Nature - Zeri

Lynn Margulis was an eminent American evolutionary biologist. Her serial endosymbiotic theory (SET) of eukaryotic cell development overturned the modern concept of how life originated on earth. She argued that different types of bacteria, through "sympiogenesis", formed more complicated single organisms.
