I did not test every single C#7 feature, but in general, with the exception of Tuples (and their related features like deconstruction), it should work in .NET 2.0 and above as most of it is just syntactic sugar. That being said, yes you need VS2017 to compile C#7. I'm sure at some point other compilers will support C#7 but not today.

#### **Perusing C# 7.1**

C# 7.1 adds a new target-typed default literal that provides a shortcut for the default(T) operator using type inference. In earlier versions of C#, to get the default value for a type, you had to specify the type explicitly. For example, default(int) returned 0. C# 7.1 allows you to drop the type and have it inferred automatically.

By default C# projects in Visual Studio use the latest major release of the language (which would be 7.0 as of this writing). To change this, open up the project's properties, select the Build page, click Advanced..., and under General set Language Version to "C# 7.2".. Per phuzi's comment mentioning this question, you might need to update to the latest Visual Studio in order to see this option.
