Store | .htaccess made easy

Often, .htaccess files are created automatically, so you will usually have one. But this isn't always the case. If you really don't have one, you can easily create one: Start a new file in a plain text editor. Save it in ASCII format (not UTF-8 or anything else) as .htaccess. Make sure that it isn't htaccess.txt or something like that.

Access Control for Apache 2.4 (and 2.2) | .htaccess made easy

In newer versions of Apache, writing a comment requires the entire line. That is, when you add a pound sign to make a comment, it must be the first non-blank character on the line. If you add any non-blank characters before the pound sign, say hello to one of those nasty 500-level server errors. So for example, any of these comments is legit:
