All engines in the Ford Mondeo Mk3 have timing chains and they are usually reliable. The 4-speed automatic transmission ( CD4E) used with the 2.0 Duratec-HE has a bad reputation for overheating and breaking itself apart due to excessive line pressure. Most of the bad rep comes from the earlier Ford and Mazda models.

Duratec is a brand name of the Ford Motor Company used for the company's range of gasoline-powered four-cylinder, five-cylinder and six-cylinder passenger car engines.. The original 1993 Duratec V6 engine was designed by Ford and Porsche. Ford first introduced this engine in the Ford Mondeo. Over time, "Duratec" became an omnibus name for Ford's gasoline engines unrelated to the original V6.

## **Ford Duratec engine - Wikipedia**

The Ford Duratec V6, also known as the Mondeo V6, is an aluminum DOHC V6 engine with a 60° bank angle introduced in 1993 with the Ford Mondeo. The primary engineering input came from Porsche, who was developing a similar V6 before selling the engineering to Ford, and Cosworth, who helped with cylinder head manufacturing. The Jaguar AJ-V6 engine is similar but adds variable valve timing
