Plants Beekeeping

Bees are essential to a garden. Without their help in pollinating plants, there would be few flowers or vegetables. There are many things we can do to make our gardens more attractive to bees. One of the simplest is to grow plants that are rich in nectar and pollen. Not all plants provide these two basic needs.

The Best Plants to Attract Bees - The Spruce

Herbs make wonderful bee-friendly plants because you can also use them in your own cooking. One of the best herbs—for both you and your honey bees—is mint. This plant is extraordinarily easy to grow. Just be careful to plant your mint in a container so that it doesn't take over the rest of your garden.
