The Box explains how the modern era of globalization was made possible, not by politicians agreeing to cut trade tariffs and quotas, but by the humble shipping container." ---David Smith, The Sunday Times

The Box: How the Shipping Container Made the World Smaller ...

I found "The Box" was absolutely fascinating. The story of the shipping container may have been largely ignored, but it explains so much about the onset of globalisation in late 20th century. Until the mid 1960s, ocean freight was transported in breakbulk ships; the cargo manually jammed into the ships' holds by teams of longshoremen.

The Box by Marc Levinson (no relation, despite the fact he too writes books on transportation) is a new book on the history of container shipping. It is a fascinating account of this method of shipping's birth in multiple places, but primarily fostered by Malcom McLean, through its growth and expansion, driving the evolution of both the ships that containers sail on as well as the ports at which they are transferred.

It is the subject of an excellent book I read this summer called The Box: How the Shipping Container Made the World Smaller and the World Economy Bigger, by a former Economist editor named Marc Levinson. The Box is mostly about globalization, but there is also a larger story here that touches on business and philanthropy more broadly.

Innovation, disruption, and progress: what do vaccines ...

Yet Levinson knew that the subject of The Box was actually a launch point for a larger story: how containers standardized shipping, drove companies to change how and where they manufactured their goods, and, ultimately, accelerated globalization. When it was published, the craze for bigger ships and deeper ports was at its zenith; there seemed to be no limit to consumer demand for stuff.
