Prevent Falls and Fractures | National Institute on Aging

The falls then re-established at about the area of the Whirlpool Rapids Bridge and resumed carving its way through solid rock to its present location.

Cavitation is a special type of erosion that happens at waterfalls because only at the base of waterfalls is there enough speed to produce enough bubbles close enough to rock to affect it.

Niagara Falls Facts | Geology Facts & Figures

The acceleration of free-falling objects is therefore called the acceleration due to gravity. The acceleration due to gravity is constant, which means we can apply the kinematics equations to any falling object where air resistance and friction are negligible. This opens a broad class of interesting situations to us.

(Difficulty: 3) The last way that I was able to experience Palouse Falls was on the access trail to the Upper Palouse Falls. From there, it would then approach the Castle Rock (i.e. the pinnacles or the “mohawk”), which sat directly at the top of the main drop of Palouse Falls.

Palouse Falls - A Remote Waterfall in Washington's Scablands

The falls, creek and canyon are named after Christopher McWay, an early settler and farmer from New York state who arrived in the area with his son Christopher Jr. around 1874. The park itself is named after Julia Pfeiffer Burns (1868-1928), a local and legendary early pioneer and resident who impressed Helen Brown and had run a ranch in McWay ...
